

Buildingsonfire.2012

Dedicated to the Art and Science of Building Construction,
Firefighting and Command Risk Management

for Operational Excellence and
Firefighter Safety

Building Construction and Systems Training for Commanders, Company Officers and Firefighters

Buildingsonfire.com

Executive Producer

Christopher J. Naum, SFPE

Building Knowledge = Firefighter Safety

An Exceptional series of programs brought to by the Command Institute and Buildingsonfire.com examining trends and methods in building construction for the fire service with an emphasize on construction and occupancy risk assessment, structural and construction systems, and their direct relationship on structural combat firefighting operations, firefighter survivability and the command decision-making process. Understand building systems and occupancy performance under fire conditions is mission critical with new and emerging technical information and data that is redefining tactical and operational models and firefighting protocols with new rules of engagement.

Firefighters and Officers will gain a new understanding of inherent construction features and hazards that directly influence effective risk management and decisive strategic and tactical considerations with a focus on key construction features, inherent occupancy profiles that will influence strategic, tactical and task level operations and crucial assembly systems affected by fire dynamics, extreme fire behavior and combat fire suppression operations. Case studies will reinforce concepts presented and evoked open discussion and dialog on building construction and operational safety.

Programs utilize extensive multimedia, interactive activities, case studies and simulations to reinforce course content & subject areas providing exceptional learning opportunities. Check out Buildingsonfire.com and CommandSafety.com

New Seminars & Lectures

- Building Construction for the Company and Command Officer
- The Rules of Combat Fire Engagement & Tactical Operations
- Reading the Building: Predictive Occupancy Profiling
- The New Fireground: Engineered Systems, Construction & Tactics for the Company and Command Officer
- Building Construction and Tactical Operations
- Adaptive Fire Ground Management
- The Anatomy of Buildingsonfire 2012
- Five Star Command & Fire Fighter Safety
- The Doctrine of Combat Fire Operations 2012
- Extreme Fire Behavior & Fireground Operations
- Tactical Entertainment and Firefighter Safety
- Dynamic Risk Assessment & Firefighting Operations
- Tactical Renaissance: Building Construction & Tactical Excellence
- Occupancy Risk Profiling and Firefighting Strategy & Tactics
- Keynotes ,Lectures, Special Presentations & Programs Available
- Other Building Construction , Command, Tactic, Fire Fighter Safety and Operations programs available
- Visit Buildingsonfire.com and CommandSafety.com

Christopher J. Naum

36 year Fire Service Veteran
Nationally Recognized & Highly
Acclaimed Author, Instructor, Officer
and leading authority on building
construction & Firefighter safety,
National Fire Academy Instructor,
Firefighter Safety Advocate, Architect,
Fire Protection Engineer, Consultant,
Instructor, Contributing Editor
Firehouse Magazine & Firehouse.com,
National Radio Show Host, SME
Consultant to NIOSH Firefighter LODD
